

Quintel Opens North American Headquarters in Silicon Valley

Mountain View, California facility houses new R&D center and sales, marketing and administrative operations

MOUNTAIN VIEW, Calif. – August 19, 2009 – [Quintel](#), a leader in the design, development and delivery of network-efficient antennas for wireless operators, today announced the opening of its North American headquarters in Mountain View, California. The facility houses the company's new research and development center for worldwide development, and sales, marketing and administrative operations. Quintel's European headquarters is located in Bicester, England.

"With the number of global wireless subscribers expected to reach five billion users in the next five years, wireless operators are upgrading their infrastructures to seamlessly accommodate rapidly rising demand while maximizing their network investment," said Steve Obsitnik, Quintel's chairman and CEO. "The North American and European facilities will enable us to leverage two geographic centers to drive diversity into our innovative and unique solutions, delivering high performance and flexible [products](#) to market faster, and meeting customers' requirements now and in the future."

The Quintel North American headquarters is located in the Silicon Valley. The address is: 1916 Old Middlefield Way, Suite B, Mountain View, California, 94043-2570. The company's telephone numbers are: +1 650.353.4240 (main) and +1 650.472.9186 (fax).

"As we expand our operations globally, we will continue to draw on the best talent in the industry to support our customer's needs," added Mr. Obsitnik. "The new R&D center will continue to develop RF antenna technology for customers across multiple geographic regions that cost-effectively meets their ever-increasing service needs while concurrently addressing their future network requirements."

In addition to its headquarters' locations, Quintel has [offices](#) in the United States and Europe. Quintel plans to open offices in India in Q3 2009

About Quintel

Quintel is a world leader in the design, development and delivery of network-efficient, antenna sharing solutions. Quintel addresses the global challenges facing wireless operators and delivering on higher operating efficiencies. Quintel's solutions allow single and multiple wireless operators to independently deploy and optimize multiple air interfaces or services on a standard antenna platform, resulting in measurable reduced capital and operational costs while providing the highest levels of quality with significantly increased network capacity. Quintel is located in Mountain View, Calif. and Bicester, UK, with additional offices throughout North America, South America, Europe and Asia.
